

ACCENTURE B.TECH PLACEMENT PREPARATION BRIEF (2025–2026)

A concise 2-page preparation guide for B.Tech students and freshers

Overview Accenture is one of the world's leading IT and consulting companies, specializing in cloud computing, AI, cybersecurity, and digital transformation. For the 2025–2026 hiring cycle, the company is focusing heavily on AI-ready engineering graduates with strong programming, logical reasoning, and communication skills.

Hiring Process

Behavioral Assessment – Situational MCQs to test teamwork and workplace ethics.

Cognitive/Aptitude Test – Logical reasoning, verbal ability, and numerical aptitude.

Technical Assessment – Questions on pseudocode, networking, cloud basics, and cybersecurity.

Coding Round – 2–3 programming problems in C, C++, Java, Python, or JavaScript.

Communication Assessment – Voice-based English fluency and pronunciation evaluation.

Technical + HR Interview – Discussion on projects, OOPs, SQL, SDLC, and career goals.

Technical Skills Required

Programming Languages: Java, Python, C/C++, or .NET

Web Technologies: HTML, CSS, JavaScript, React, Angular

Frameworks: Spring Boot, Flask, Django, ASP.NET Core

Databases: MySQL, PostgreSQL, Oracle, SQL Server

Cloud Platforms: AWS and Microsoft Azure basics

Tools: Git, GitHub, Docker, CI/CD concepts

Recent Industry Trends (2025–2026) Accenture has expanded investments in AI, cloud infrastructure, and automation. The company has trained thousands of employees in Generative AI and plans to increase entry-level hiring for cloud and AI-related projects. Students with AI awareness, automation knowledge, and adaptability will have better placement opportunities.

Eligibility Criteria

Minimum 60% in 10th, 12th, and B.Tech.

No active backlogs during recruitment.

All engineering branches are eligible.

Maximum 1-year educational gap allowed.

Freshers should have less than 11 months of work experience.

Expected Salary Packages Associate Software Engineer (ASE): ■4.5–■4.8 LPA Advanced Associate Software Engineer (AASE): ■4.6–■6.0 LPA

Preparation Tips for Students

Maintain a CGPA above 65% and clear all backlogs.

Practice coding regularly on HackerRank or LeetCode.

Strengthen SQL, OOPs, and aptitude concepts.

Improve spoken English and participate in mock interviews.

Build at least one cloud or AI-based project using GitHub.

Conclusion Accenture's 2025–2026 recruitment process emphasizes technical skills, adaptability, communication, and AI awareness. Students who combine strong programming fundamentals with aptitude preparation and practical projects will have a higher chance of securing placement.
